**DETAILED ACTION**

***Terminal Disclaimer***

1. The terminal disclaimer filed on 08/22/2005 disclaiming the terminal portion of any patent granted on this application, which would extend beyond the expiration date of US 6,628,430 has been reviewed and is accepted. The terminal disclaimer has been recorded.

***Response to Amendment***

2. The amendment filed on 08/22/05 has been entered and made of record. Claims 1-4 are now pending.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Kumar (US 5,294,782).

Regarding claim 1, Kumar discloses a handheld mobile communications device that comprises a support structure; a camera device positioned on the support structure and operatively connected to the mobile communications device; and a printing mechanism mountable on the support structure and operatively connected to the camera device for printing images generate the camera device (Col 4 Lines 15-60; Figs 1; 6).

For claim 2, Kumar teaches in which the printing mechanism includes a pagewidth printhead and an ink distribution unit mounted on the printhead to supply ink to the printhead (Col 4 Lines 15-60; Figs 1; 6).

For claim 3, Kumar teaches in which the printhead includes a printhead chip that spans a print media pathway, the printhead chip defining a plurality of ink inlets for the supply of ink to the printhead chip (Col 4 Lines 15-60; Figs 1; 6).

For claim 4, Kumar discloses in which the ink distribution unit defines a number of discrete ink supply chambers and a plurality of ink pathways interposed between the ink supply chambers and ink inlets, the ink pathways converging towards the ink inlets so that each ink inlet is supplied with ink from a respective ink pathway (Col 4 Lines 15-60; Figs 1; 6).

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 6,742, 887 Portable Electronic Device with Printing Mechanism.
